

Big State Warehouse is proud to offer a full line of **SOUTHWEST MANUFACTURING INNOVATIONS** wing hammer unions from Figure 100 to Figure 1502.

## **SOUTHWEST MANUFACTURING INNOVATIONS**

**SOUTHWEST MANUFACTURING INNOVATIONS** hammer unions are **“Designed by the Oilfield, for the Oilfield”**. Significant time was spent with oilfield suppliers and end-users to gain an understanding of their requested changes and improvements that could be incorporated into a new line of hammer unions ideally suited for the oilfield. **SOUTHWEST MANUFACTURING INNOVATIONS** then incorporated those requested changes for the purpose of developing the **“Best of Breed”** in wing hammer unions.

**SOUTHWEST MANUFACTURING INNOVATIONS** hammer unions are produced with a **forging process** as opposed to a casting process. (This forging process strengthens the **SOUTHWEST MANUFACTURING INNOVATIONS’** hammer union in terms of impact and shear strength.)
